MiLi

MiTag for Apple Devices using 'Find My' app

The MiLi MiTag is the easy way to keep track of your items before and after they go missing! Attach the MiTag to your keys or place it inside your backpack for on the move tracking. Once linked, the MiTag will appear in the 'Find My' app, exclusive to Apple devices.

When in bluetooth range, the MiTag can be pinged from the app, making it easier to find. When your MiTag isn't within bluetooth range and is further away then you might think, the Apple Find My network uses hundreds of near-by Apple devices to give you a location of where your belongings will be. Advanced end-to-end encryption and leading security ensures peace of mind that your privacy and data is protected when using the Find My network.

The MiTag comes complete with a leather keyring case, which comes in 4 colour options and can be dual branded with the MiLi logo to one side and your logo to the other.
