Product introduction

Points / Advantages

⚡ 35mm | 1.38in

MiLi Table Mate

Space-Seperated
Wireless Charging

Using advanced wireless charging technology and magnetic resonance, the wireless charger can be applied under a table to provide wireless charging to any wireless enabled devices.

Oil-proof and
waterproof

Secure Grip
to table surface

Out of sight
Installation

Table Mate

The wireless charger can be attached to tables made out of most materials for a quick and convenient charge.

- Magnetic resonance technology is used to separate the sensor disc from the transmitter unit.

0.6mm thin sensor disc: Providing a subtle and cleaner table space.

- Supports 20-35mm thick tables and desks between the transmitter and sensor.

Applicable to tables made of stone, wood, glass, ceramic and other materials excluding all metal surfaces. No modifications need to be made to your furniture.

Advantages

- Optimize Customer Experience
- Revolutionary Charging Option
- Easy installation

Widely Compatible

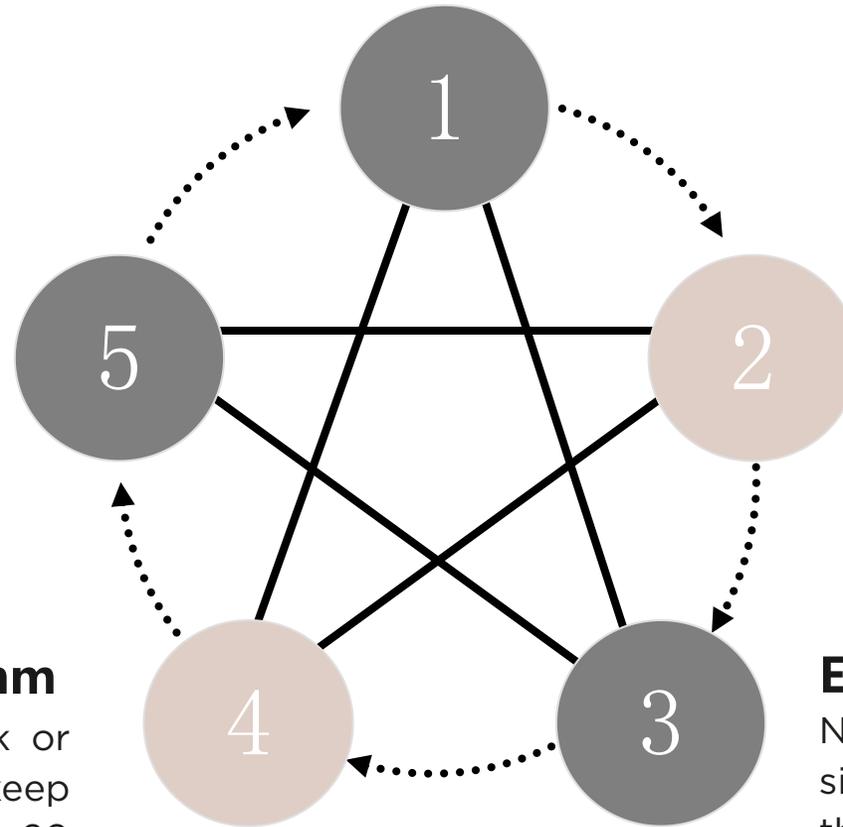

Can be installed on non metallic tables, such as wood, glass, marble, ceramic and many more.

Table Thickness 20-35mm

No need to change your desk or table. Wireless Charging will keep functioning with tables between 20 to 35mm in thickness.

Convenient Charge

Devices supporting wireless charging such as mobile phones have a simple and convenient charging option.

Save Space

With the transmitter installed under the table, and a 0.6mm ultra-thin sensor disc on top, you don't have to worry about desktop space.

Easy Installation

No need to change your furniture, simply stick the transmitter under the table and the sensor on top.

03

Advantages

Optimizing Consumption Experience / Customization

(1) Optimizing Consumption Experience

The convenience of wireless charging at your table side inside bars, restaurants or cafés allows for a worry-free experience for consumers. Brand presence is also highly apparent with the MiLi Table Mate. High-quality custom branding on the surface of the sensor allows any table top or desk to become a billboard for brands.

(2) Customization

The whole surface of the sensor disc can be branded to suit any brand or style.

Case

(3) Advertising space rental

Merchants can use the sensor discs branding area as advertising space to relevant recognisable brands such as Heineken, Pepsi, Coca Cola or Mercedes to entice customers into their establishment.

MiLi Tablemate

Case example

Brands such as Heineken, Budweiser and other consumable goods will order the Table Mate to print their logo and brand advertisement.

A well-established bar which sells a brand such as Heineken, will receive the MiLi Table Mate as a gift for ordering a certain quantity of bottles.

The bar will benefit from this due to a better customer experience and more visitors, resulting in an effect in sales.

The brand will also benefit from this due to a bigger brand presence in the bar, leading to more Heineken orders by customers and the bar.
