

JELLYFISH CHARGER

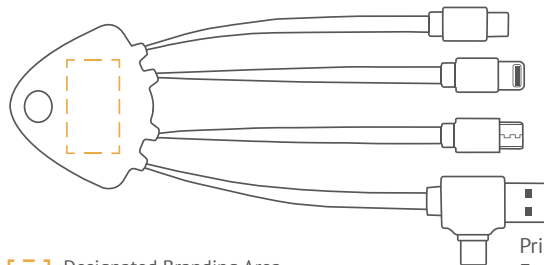

Identical to the original jellyfish, but now available in recycled and environmentally friendly wheat straw material! Wheat straw is the stalk left over after wheat grains are harvested. Traditionally, it has been treated as a waste. In some countries, farmers burn it, contributing to air pollution and creating a public health hazard. When mixed with other materials, it becomes an amazing plastic substitute and helps against the impacts of plastic waste.

No matter the device, the ECO Jellyfish charger will keep you connected! Featuring Type-C, Lightning and Micro-USB connectors, you will be able to charge a wide range of devices- simply plug into a certified charger or computer to start charging your devices. Each of the Jellyfish's cables are between 95 - 105mm and are able to twist and turn to your needs.
