Worldwide Precise Locating

Flexible Usage Scenarios

Privacy Protection

IP67 Dustproof and Waterproof

Simple Click to Connect

Rechargeable Battery: 4-5 Months

Meet with MiLi MiCard Duo

With the help of hundreds of millions of iOS or Android devices, you can locate your misplaced items easily.

Powered by Apple Find My and Google's Find Hub

Worldwide Locating

Every iOS or Android device acts as a signal beacon to help locate your item.

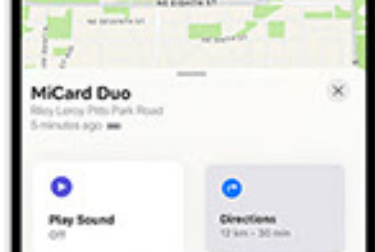

Encrypted for Privacy

Device location data on the Apple Find My and Google Find Hub network is encrypted using the PIN, pattern or password for your iOS and Android device, helping protect the privacy of everyone participating in the network.

One Click to Operate

Easy setup with a single press simply bring the tag close to your phone and a popup appears. Just 1 press to power on + 3 simple steps to connect.

Share Your Device

Each tag can be shared via a link with your family, partner, or friends, allowing them to view the tag's location with you.

Global Secure Network

Some extra help from a global network. Apple Find My and Google's Find Hub use a global network of iOS and Android devices to locate your belongings almost anywhere.

Listen for the Sound

You can tap "Play sound" to ring a device, making it easier to find if it fell behind your bed or is buried beneath some pillows.

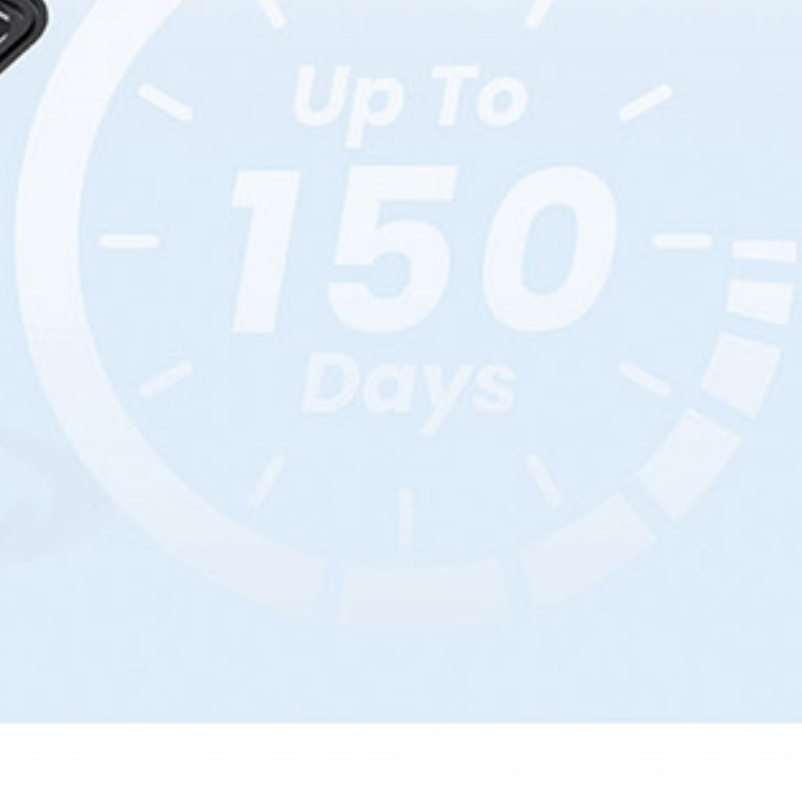

IP67 Dustproof and Waterproof

IP67 water and dust resistance built to handle all outdoor scenarios with ease.

Rechargeable Battery Up to 4-5 Months Runtime

Powered by a CR2032 battery with a lifespan of 200-300 days. You can check the battery status and replace it in time via Apple Find My and Google's Find Hub.

No worries if lost!

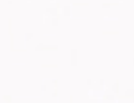

MiCard Pro has NFC functionality. If someone finds it, they can identify and contact you via NFC or by scanning the code on the MiCard Pro!
